CONNECTED

### AEROSPACE QUALITY POLICY

Top management establishes, implements and maintains the following aerospace quality policy:

- **Develop** products, processes, innovative and high performance Technologies;
- **Ensure** conformity of products and service and on-time delivery performance, aiming a stable supply;
- **Meet** the customer requirements, the organization and other interested parties;
- **Enhance** the customer satisfaction;
- **Continually improve** the aerospace quality management system.

All employees are responsible for the good performance of the Aerospace Quality Management System and for its continual improvement. They are also responsible for maintaining the confidentiality, integrity and availability of documented information regarding processes and products to which they have access.
